Education

C.K. Pithawala College of Engineering and Technology (GTU)

July 2023 - May 2027

Bachelor of Engineering in Computer Engineering (3rd year Pursuing)

About Me

I am third-year Computer Engineering student with intermediate understanding of data analytics and currently developing skills in data science. I am a Grand Finalist of Smart India Hackathon (SIH) 2025, with hands-on experience in building AI-driven systems focused on automation, analytics, and decision support. My projects span enterprise document evaluation, intelligent recommendation systems, and resume analytics. I am currently working on an AI-powered retail intelligence platform, RetailSense AI, and actively seeking industry exposure to apply my analytical and problem-solving skills in real-world environments.

Projects

AI-Based DPR Evaluation System (SIH - MDoNER)

- Automated DPR compliance and risk checks using NLP, cutting review time from hours to minutes.
- Implemented hybrid PDF extraction and semantic chunking for scanned, multilingual reports.
- Designed a RAG + rule-based engine for explainable guideline validation.
- Deployed an offline FastAPI backend generating structured JSON outputs.

Resume Analyzer

- Developed an AI-based resume analysis system using Python, FastAPI, and NLP to extract skills, experience, and keywords from PDF/DOCX documents.
- Implemented text parsing, data extraction, and keyword matching to evaluate resume relevance against job roles.
- Built a responsive frontend using React and Tailwind CSS for resume upload, processing, and result visualization.
- Enabled resume scoring, skill-gap analysis, and data-driven insights to support recruitment and talent screening.

RetailSense AI | AI-Powered Retail Intelligence

- Built an AI-driven retail analytics system for sales analysis, demand forecasting, and pricing insights.
- Implemented data preprocessing and time-series forecasting (Prophet) for predictive analytics.
- Developed an AI-based insight generator to support inventory, pricing, and promotion decisions.
- Created an interactive AI Copilot (Streamlit) for natural language business queries.

AI-Based Internship Recommendation System

- Built an AI-driven system to match student profiles with relevant internships using skill extraction and NLP.
- Implemented resume parsing, scoring logic, and ranking to generate personalized internship recommendations.
- Delivered ranked internship suggestions with relevance scores to support student decision-making.

Technical Skills

Languages: Python, PostgreSQL

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Tools: Git, GitHub, Jupyter Notebook, Visual Studio Code, Google Colab

Coursework: Data Analysis, Data Science (Learning)

Achievements

Finalist- Smart India Hackathon (SIH) 2025 national-level problem statement by MDoNER (Government of India) on AI-based DPR evaluation.

Certifications

Foundation Course on Data Analysis and AI- SAP × Edunet (Code Unnati Program)
